

HTML

Building your portfolio

What's next?

Over the last 11 lessons, you've learnt **HTML** inside and out, over 30 elements and you now understand its structure.

Now you need to build your own portfolio to show us and yourself what you can do.

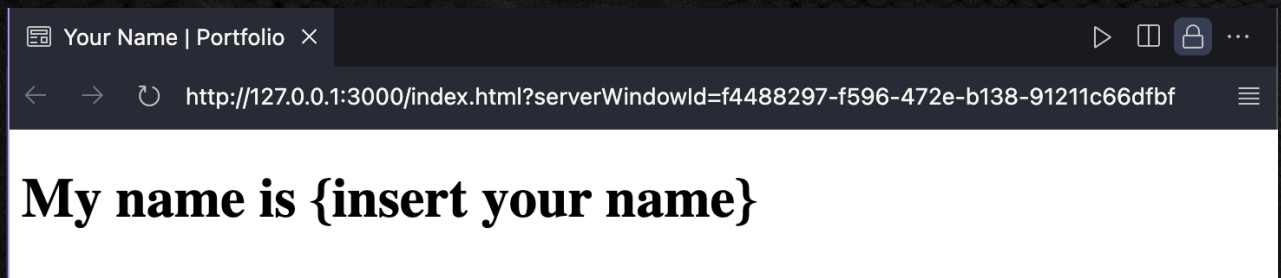

If you haven't created an fst folder to store your work yet, then that's what we'll get started with.

```
macuser@Saabirs-MacBook-Pro ~ % mkdir fst
macuser@Saabirs-MacBook-Pro ~ % cd fst
macuser@Saabirs-MacBook-Pro fst % mkdir html
macuser@Saabirs-MacBook-Pro fst % cd html
macuser@Saabirs-MacBook-Pro html % touch homepage.html
macuser@Saabirs-MacBook-Pro html % ls
homepage.html
```

First, follow the steps above to create an FST folder, a **HTML** folder and finally a file that we will work with.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <title>Your Name | Portfolio</title>
5 </head>
6 <body>
7   <h1>My name is {insert your name}</h1>
8 </body>
9 </html>
```

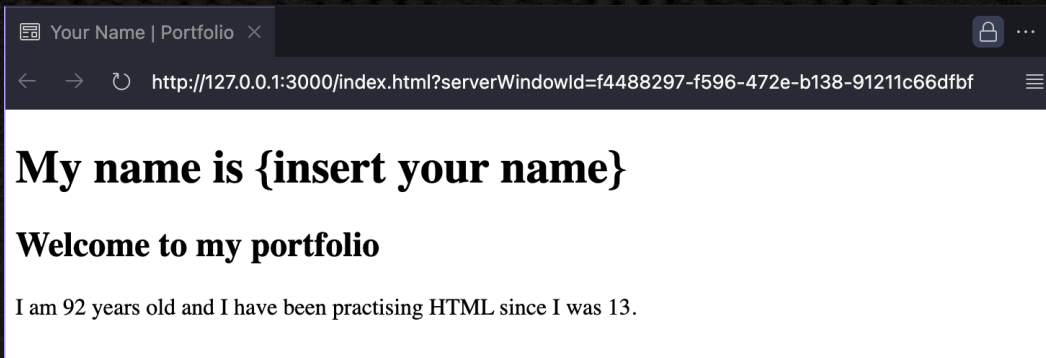

Open VSCode, put your name in the title and add a h1 in the body.

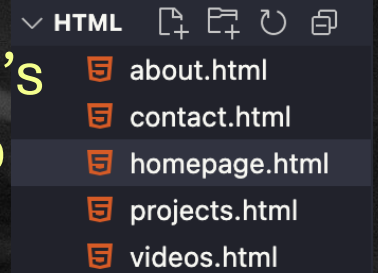

Building your portfolio #2

After adding our `<h1>`, our portfolio is still looking a bit bare so let's add a `<h2>` with a welcome message and a `<p>` talking about who we are!

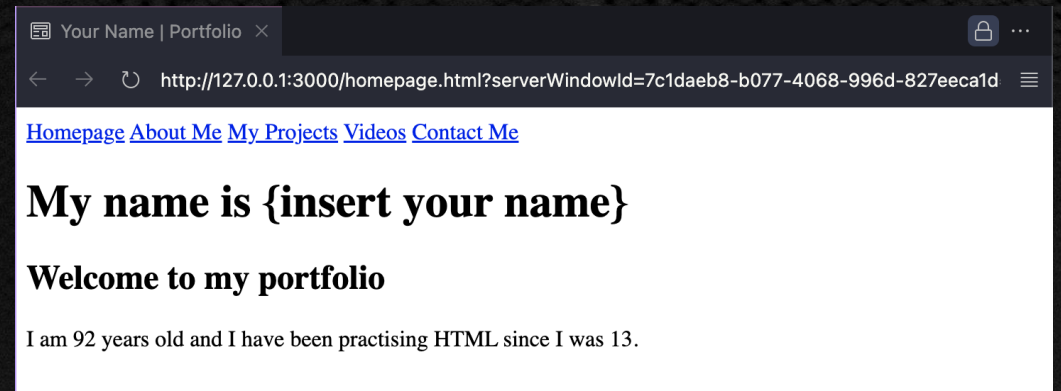

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <title>Your Name | Portfolio</title>
5 </head>
6 <body>
7   <h1>My name is {insert your name}</h1>
8   <h2>Welcome to my portfolio</h2>
9
10  <p>I am 92 years old and I have been practising HTML since I was 13.</p>
11 </body>
12 </html>
```

We've only got one page so let's add a navigation bar at the top that connect to other files.

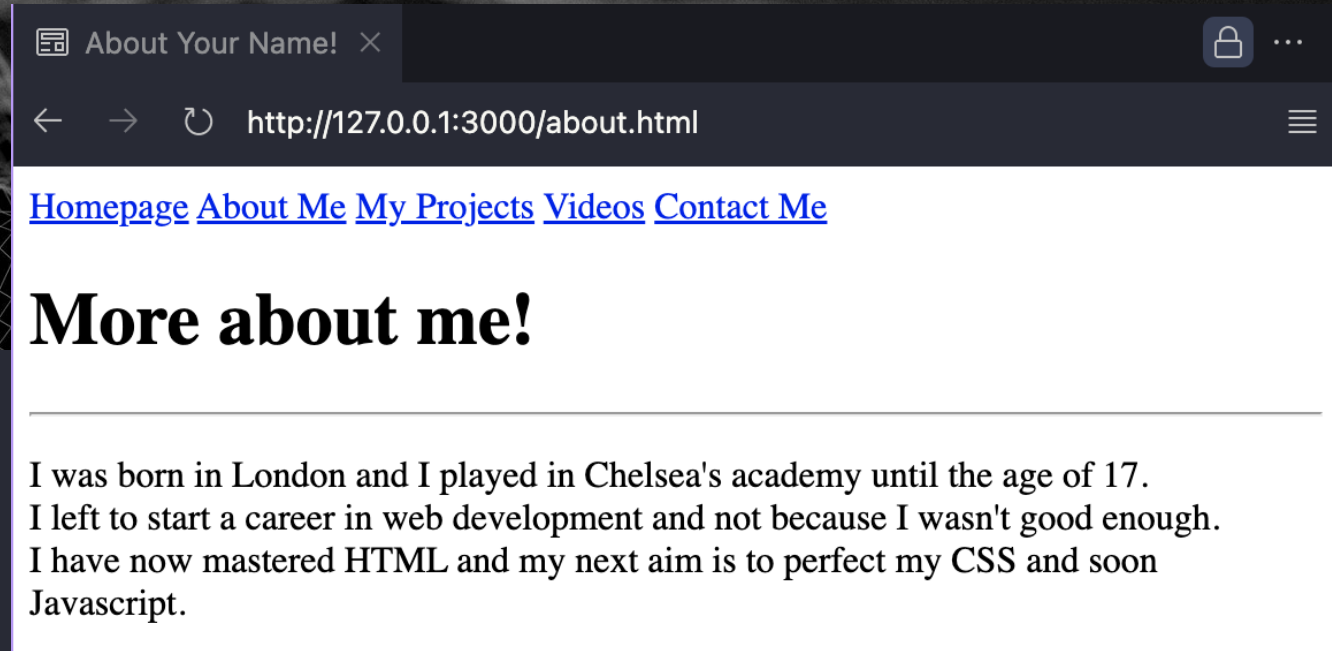

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <title>Your Name | Portfolio</title>
5 </head>
6 <body>
7   <a href="homepage.html">Homepage</a>
8   <a href="about.html">About Me</a>
9   <a href="projects.html">My Projects</a>
10  <a href="videos.html">Videos</a>
11  <a href="contact.html">Contact Me</a>
12
13  <h1>My name is {insert your name}</h1>
14  <h2>Welcome to my portfolio</h2>
15
16  <p>I am 92 years old and I have been practising HTML since I was 13.</p>
17 </body>
18 </html>
```

Building your portfolio #3

Let's work on our "about me" page and we'll use some more `<p>` while also bringing `<hr>` and `<br>` too.

```
1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <title>About Your Name!</title>
5    </head>
6    <body>
7      <a href="homepage.html">Homepage</a>
8      <a href="about.html">About Me</a>
9      <a href="projects.html">My Projects</a>
10     <a href="videos.html">Videos</a>
11     <a href="contact.html">Contact Me</a>
12
13     <h1>More about me!</h1>
14     <hr />
15     <p>
16       I was born in London and I played in Chelsea's academy until the age of
17       17. <br />
18       I left to start a career in web development and not because I wasn't good enough. <br />
19       I have now mastered HTML and my next aim is to perfect my CSS and soon
20       Javascript.
21     </p>
22     <br />
23   </body>
24 </html>
```

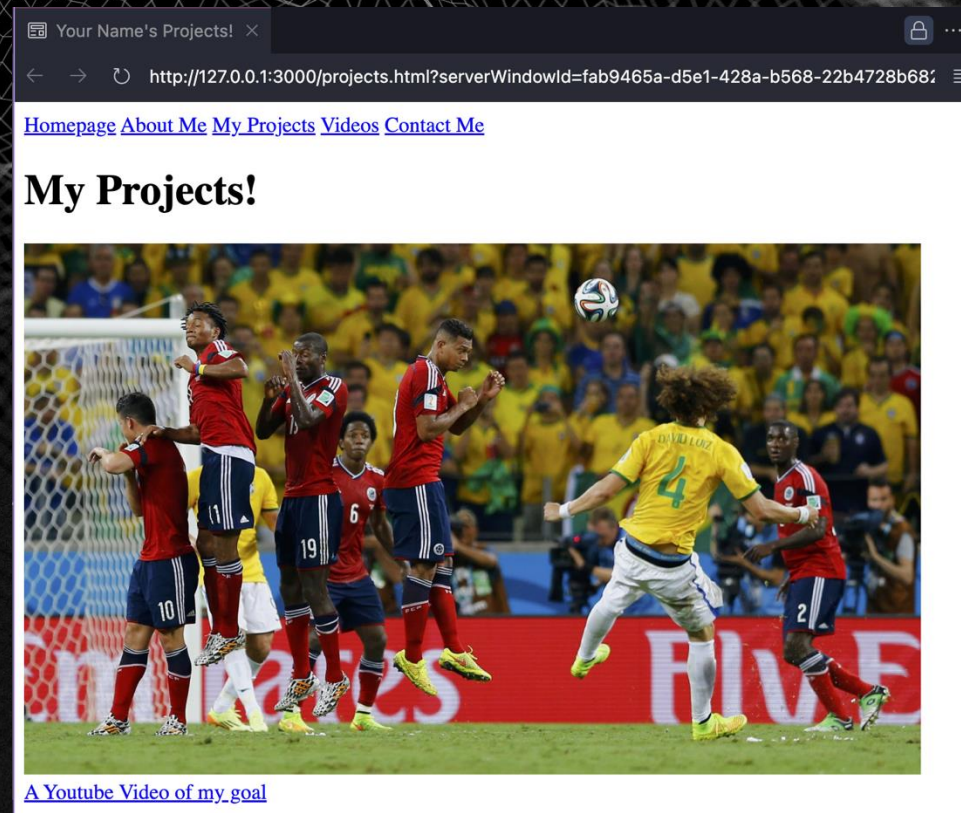

We also want smooth routing between our pages so make sure to add the navigation to all pages.

Building your portfolio #4

It's not always good to show off but when it's a project you've worked hard on, we'll let it slide.

I'm going to add a picture of something I worked on using `<img>` and adding an `<a>` underneath it. This is so whoever wants to see it for themselves can easily.

```
1 <!DOCTYPE html>
2 <html lang="en">
3   <head>
4     <title>Your Name's Projects!</title>
5   </head>
6   <body>
7     <a href="homepage.html">Homepage</a>
8     <a href="about.html">About Me</a>
9     <a href="projects.html">My Projects</a>
10    <a href="videos.html">Videos</a>
11    <a href="contact.html">Contact Me</a>
12
13    <h1>My Projects!</h1>
14
15    
20    <br />
21    <a
22      href="https://www.youtube.com/watch?v=aRttWf0Ucns">
23      A Youtube Video of my goal
24    </a>
25  </body>
26 </html>
```

It's all about UX (user experience). If your `<img>` is too big, adjust using the `height` attribute.

Building your portfolio #5

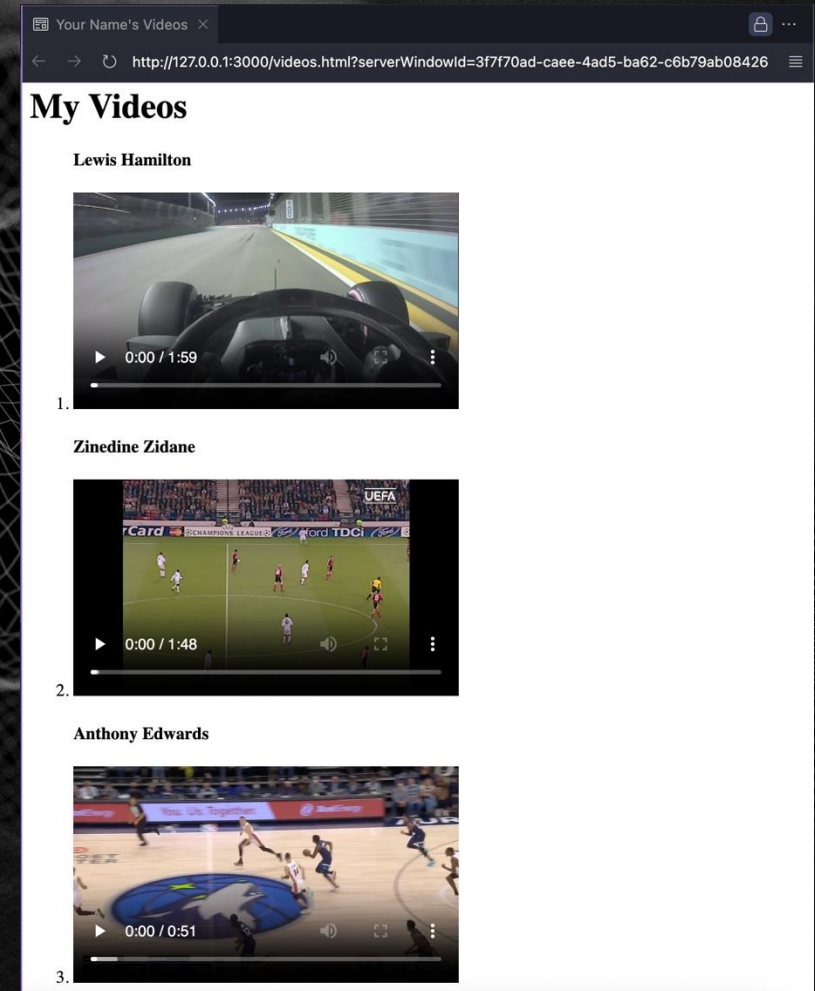

Next up is adding a `<video>`.

This could be a summary of yourself, your skills and your work or a random clip.

And to spice things up let's put it in an `<ol>`.

Don't forget to adjust the `height` and add the `controls` attribute to have control of your video.

```
1 <!DOCTYPE html>
2 <html lang="en">
3   <head>
4     <title>Your Name's Videos</title>
5   </head>
6   <body>
7     <h1>My Videos</h1>
8
9     <ol>
10      <h4>Lewis Hamilton</h4>
11      <li>
12        <video height="200px" controls>
13          <source src="hamilton.mp4" />
14        </video>
15      </li>
16      <h4>Zinedine Zidane</h4>
17      <li>
18        <video height="200px" controls>
19          <source src="zidane.mp4" />
20        </video>
21      </li>
22      <h4>Anthony Edwards</h4>
23      <li>
24        <video height="200px" controls>
25          <source src="edwards.mp4" />
26        </video>
27      </li>
28    </ol>
29  </body>
30 </html>
```

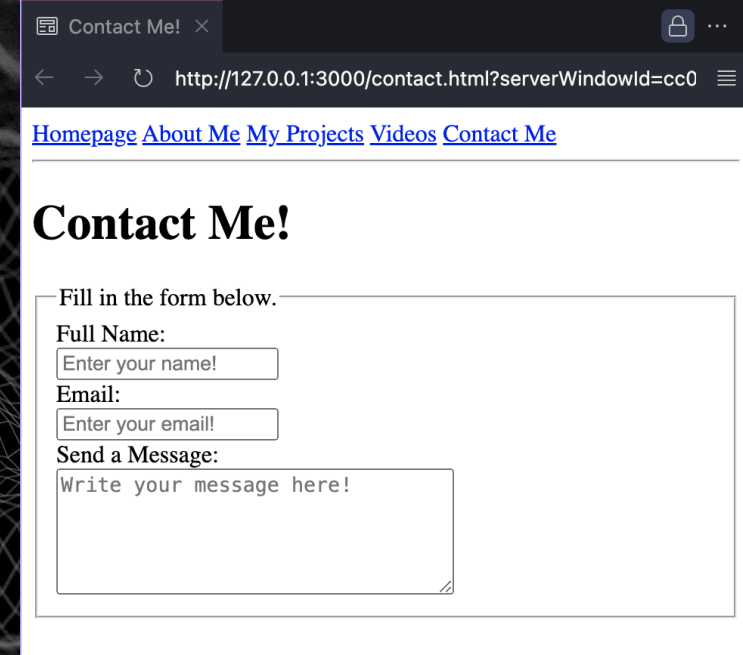

Building your portfolio #6

If a recruiter or someone looking to hire you sees your page, the best way for him/her to speak to you is via a contact me page!

We will be using the `<form>`, `<label>`, `<input>` and more!

```
1 <!DOCTYPE html>
2 <html lang="en">
3   <head>
4     <title>Contact Me!</title>
5   </head>
6   <body>
7     <a href="homepage.html">Homepage</a>
8     <a href="about.html">About Me</a>
9     <a href="projects.html">My Projects</a>
10    <a href="videos.html">Videos</a>
11    <a href="contact.html">Contact Me</a>
12
13    <hr />
14
15    <h1>Contact Me!</h1>
16
17    <fieldset>
18      <legend>Fill in the form below.</legend>
19      <form action="">
20        <label for="name">Full Name:</label> <br />
21        <input type="text" placeholder="Enter your name!" /> <br />
22
23        <label for="email">Email:</label> <br />
24        <input type="email" placeholder="Enter your email!" /> <br />
25
26        <label for="">Send a Message:</label> <br />
27        <textarea
28          rows="5"
29          cols="30"
30          placeholder="Write your message here!"
31        ></textarea>
32      </form>
33    </fieldset>
34  </body>
35</html>
```

The screenshot shows a web browser window with the title "Contact Me!". The address bar displays the URL "http://127.0.0.1:3000/contact.html?serverWindowId=cc0". The page has a navigation bar with links: "Homepage", "About Me", "My Projects", "Videos", and "Contact Me". Below the navigation bar is a heading "Contact Me!". Underneath the heading is a form with the following elements:

- A legend: "Fill in the form below."
- A "Full Name:" label followed by a text input field with the placeholder "Enter your name!".
- An "Email:" label followed by an email input field with the placeholder "Enter your email!".
- A "Send a Message:" label followed by a text area with the placeholder "Write your message here!".

Don't forget to use `<br>` to separate each element!

Building your portfolio #7

We only have 2 major elements left: `<div>` and everything related to `<table>`, so let's go back to the homepage and add a `<table>` talking about your experience.

Make sure to add a `border` as an attribute in order to have the bars around the data.

Job Title	Company	Years	Salary Per Year
Academy Footballer	Chelsea FC	2009-2020	£1,000,000
Formula 1 Driver	Ferrari	2020-2023	£10,000,000
Full-Stack Developer	Google	2023-Present	£100,000,000

```
18 <table border="1">
19   <thead>
20     <th>Job Title</th>
21     <th>Company</th>
22     <th>Years</th>
23     <th>Salary Per Year</th>
24   </thead>
25   <tbody>
26     <tr>
27       <td>Academy Footballer</td>
28       <td>Chelsea FC</td>
29       <td>2009-2020</td>
30       <td>£1,000,000</td>
31     </tr>
32     <tr>
33       <td>Formula 1 Driver</td>
34       <td>Ferrari</td>
35       <td>2020-2023</td>
36       <td>£10,000,000</td>
37     </tr>
38     <tr>
39       <td>Full-Stack Developer</td>
40       <td>Google</td>
41       <td>2023-Present</td>
42       <td>£100,000,000</td>
43     </tr>
44   </tbody>
45 </table>
```

Building your portfolio #8

And that's it.
Congratulations on finishing
your portfolio!

We didn't get to use `<div>`
but I'll leave that up to you.
