

HTML

HTML Videos & Audios

HTML videos

The `<video>` tag allow us to embed video content in our code.

We have 7 attributes and this is what they do:

1. `src` – provides a link to the video
2. `type` – specifies video format
3. `controls` – gives us playback controls (e.g. pause, fullscreen etc)
4. `autoplay` – autoplays the video
5. `height` – sets height
6. `width` – sets width
7. `loop` – loops the video

```
1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <title>Videos in HTML</title>
5    </head>
6    <body>
7      <h1>Robin Van Persie's Goal vs Charlton 2006</h1>
8      <video controls>
9        <source src="RVP_Goal_Vs_Charlton.mp4" type="video/mp4"/>
10     </video>
11   </body>
12 </html>
```

Robin Van Persie's Goal vs Charlton 2006

HTML audios

The `<audio>` tag allow us to embed audio content in our code.

The attributes for the `<audio>` and `<video>` are the same.

Audio

0:00 / 0:00

```
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4  |   <title>Audios in HTML</title>
5  </head>
6  <body>
7  |   <h1>Audio</h1>
8  |   <audio controls>
9  |   |   <source src="audio.mp3" type="audio/mp3">
10  |   </audio>
11 </body>
12 </html>
```

HTML meta

The metadata we see at the top of a **HTML** document gives the browser information about our website.

If someone searches up “**HTML**” into Google, our website will be one of the ones that appear in the search results.

```
1  <!DOCTYPE html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8" />
5      <meta name="description" content="Free Web Dev Tutorials" />
6      <meta name="keywords" content="HTML, CSS, Javascript" />
7      <meta name="author" content="John Doe" />
8      <meta name="viewport" content="width=device-width, initial-scale=1.0" />
9      <title>Metadata in HTML</title>
10   </head>
11   <body></body>
12 </html>
```

Well done for completing HTML!
